Construction Details: Sinuous spring base with foam padded sides and back provide added support and comfort

Cushion Construction

- Memory Foam
- 2.25lbs High Density Foam
- Pocketed Coils
- 1.80lbs Density Foam

Our cushions combine a sinuous spring suspension and a layered comfort system with memory foam and HD foam positioned above individually wrapped pocketed coils. With this design, we have engineered a firm yet comfortable seating experience without feeling like you are sinking into the furniture frame or "bottoming out". This may reduce lower back strain allowing you to sit comfortably for extended periods of time. The hybrid foam and pocketed coil cushion design also ensures a longer lifespan providing lasting and consistent comfort.
